Response to Amendment

Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 5-6 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Mack. Regarding claims 1-2 and 6, Mack discloses an electrical wire 20 having a plurality of lights 22. The electrical wire 20 is connected to a wire coil 40 and the wire coil has substantially the same radius throughout the wire coil. Regarding claims 2, 5 and 6, the wire coil 40 is bendable and substantially retractable to its original length when released (see column 4, lines 23-25). Regarding claim 9, as broadly claimed, the spring 40 of Mack would not always be flat when the coil is retracted. Especially after long term use of retracting and expanding the spring.

Claim Rejections - 35 U.S.C. § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2875

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mack. Mack discloses the claimed invention except for the teaching that the lights are integrally bound to the wire coil. It would have been an obvious engineering design choice to modify the lighting apparatus of Mack so as to make the lights integrally bound to the wire coil since such a modification, making a plurality of parts integral, is well known engineering design choice to one having ordinary skill in the art.

Allowable Subject Matter

5. Claims 4 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the prior art of record alone or in combination teaches or fairly suggest an the details of applicant's claimed invention further including "an electric wire which includes at least two intertwined electric wires, and a wire coil which extends between the intertwined electrical wires."

Art Unit: 2875

Response to Arguments

Applicant's arguments filed on 01/30/03 have been fully considered but they are not persuasive. The applicant argues that the helical wire of Mack has a different radius throughout the coil. Although the coil radius does change in radius it still meets applicant's claimed recitation of "a wire coil having substantially the same radius." As broadly claimed, the recitation of "substantially the same" means "greater than 50 percent the same." Thus, the coil radius of Mack meets this limitation.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

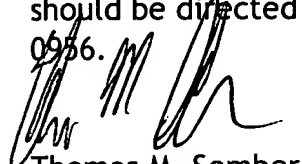

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
